

XCRYPT

FUTURE PROOF

An aerial photograph of the London skyline, featuring the River Thames, the Shard, and the Gherkin. A large blue hexagon is overlaid on the left side of the image, containing the text 'WHO WE ARE?'. Below the hexagon, there is a small grey hexagon and a thin white line extending from the bottom left corner.

WHO WE ARE?

If you want to go fast, go alone.
If you want to go far, go
together.

THE XCRYPT VIEW

PROJECT SITUATION

XCRTYPT is the first crypto ecosystem with an high added value with the heart in its exchange: hybrid, ready for securities and for a marketplace made for the ERC721.

We created this end to end system which includes a debit card and a social platform for our users to interact and create a strong community.

This ecosystem is made to be at the same level as the world's big players, and even surpass them, for we are already suitable in this field's future. The differences between Xcrypt and its competitors are several and are going to be explained below, in a user friendly graphic. We are convinced that our end to end ecosystem could attire small, medium and large investors.

-Loren xCrypt's CEO

PROBLEMS / SOLUTIONS

THE CURRENT EXCHANGES ARE FOCUSED ON THE ERC20 AND THE CRYPTOCURRENCIES, WITHOUT ANY GAZE TOWARDS THIS SYSTEM'S EVOLUTION.

XCrypt DECIDED TO PREPARE ITSELF TO THE IMMANENT FUTURE, THAT IS TO SAY IT HAS A MARKET FOR THE **ERC721** (BESIDES HAVING ONE FOR THE CRYPTOCURRENCIES AND THE ERC20) AND IT'S READY TO LIST **STO**, SINCE IT IS COMPLIANT WITH THE **SECURITY TOKENS**

HIGHT FEES TRADING AVERAGE FEES 0.2%

The average observed in the world's 30 best exchanges in 0.2%, too high in our opinion

ZERO FEES

xCrypt adopted a zero fees method, freezing them all

SECURITY ISSUE

After several known events, to which we will unfortunately keep assisting in the future, the exchanges are exposed to the counterpart risk, a huge problem, which make the users loose loyalty

DEX-CEX + CCSS

xCrypt adopts the highest security standards on the CCSS market, combining them with the CE DEX technology

SHUTDOWN WITHOUT WARNING

It happens too often that, due to problems related to the security, the exchanges must activate security measures freezing the users' balances sometimes longer than 24 hours

HIGH SERVICE QUALITY

xCrypt has in store big investments on the client service, to increase the added value and the loyalty process xCrypt has a solid regulation, offered by its host country, Malta.

SLOW CUSTOMER KYC PROCESS

After the rise in the demands in the last few months, the market top exchanges have never accelerated the KYC process, which is fundamental for a proper client service

LEGAL AND COMPLIANCE PROBLEM

The exchanges are too often subjected to legal instability, that worsen the evolution

PROBLEMS IN MAKING THE CLIENT LOYAL

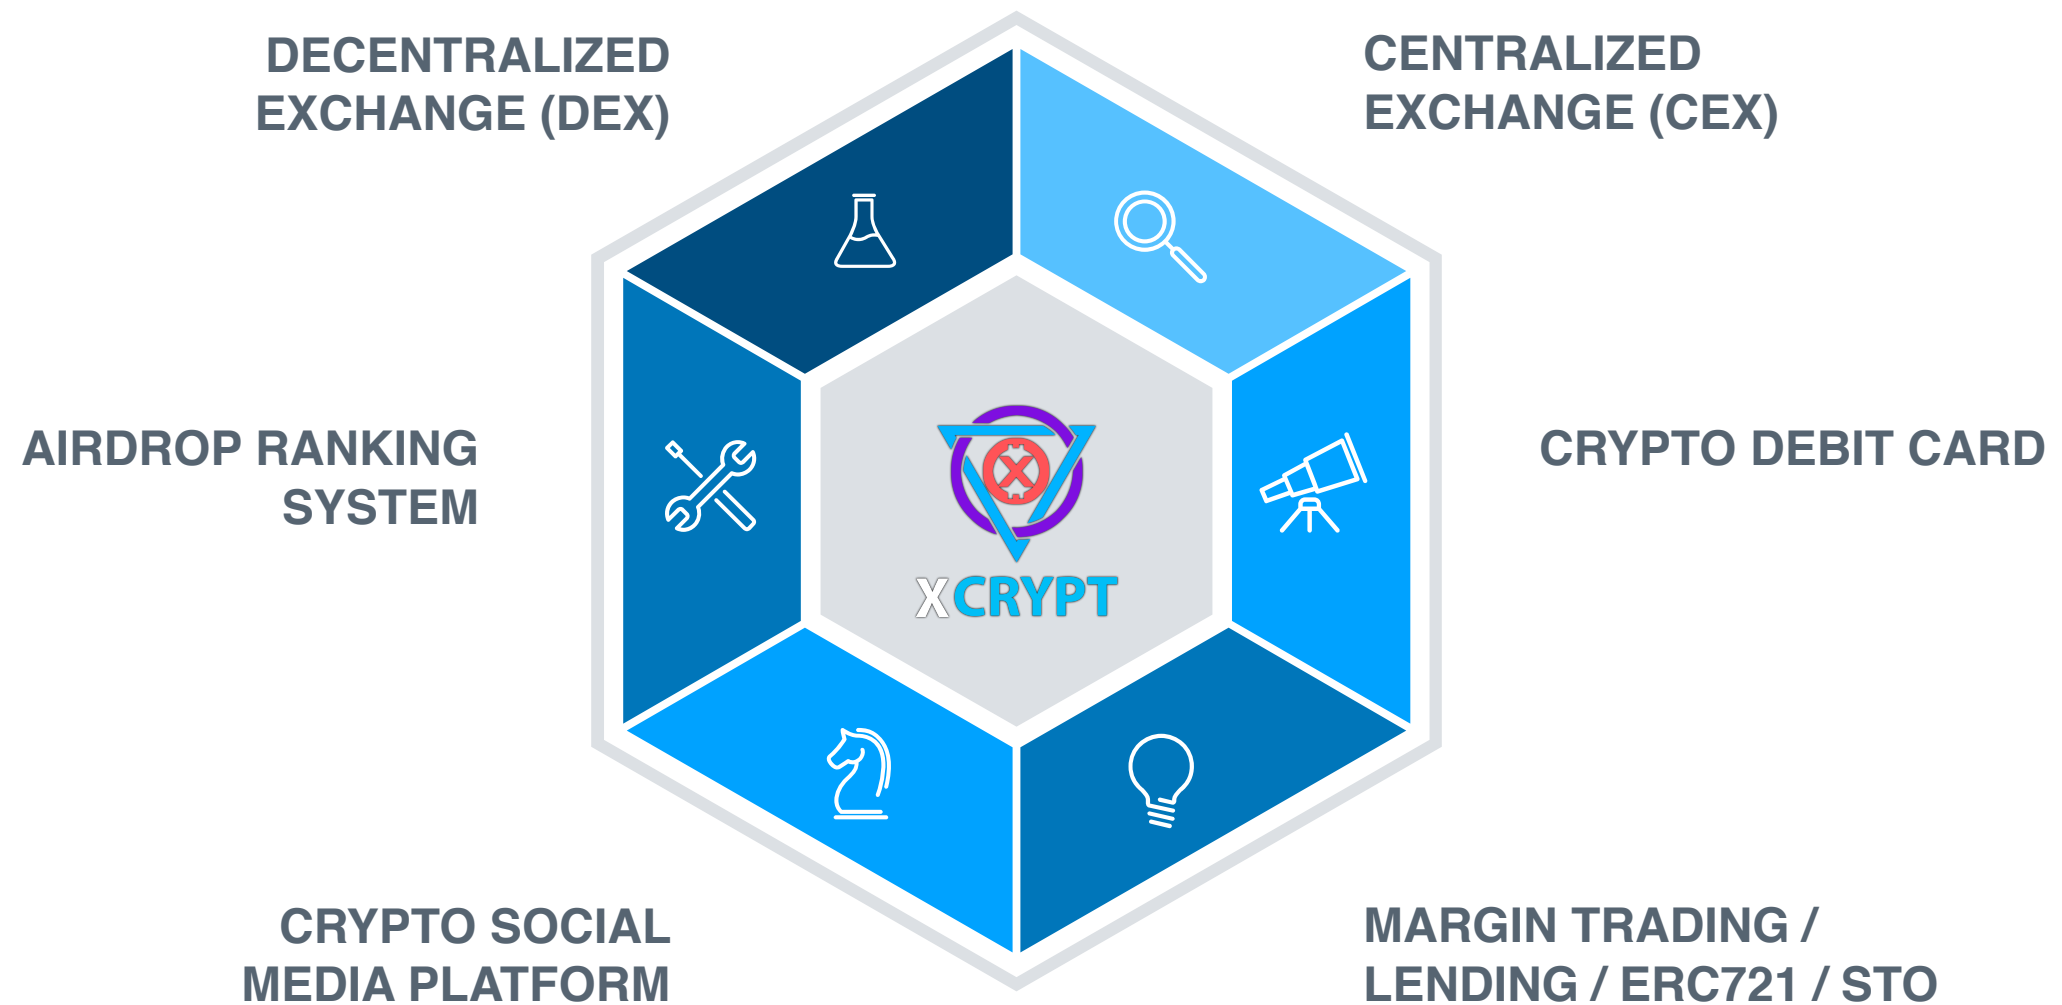

The exchanges too often don't make the clients loyal, but they only attract them, finding themselves very popular in a small period of time, but without having a solid users-base. This happens when masses move towards another platform for few added values.

PROJECT WILL START...

xCrypt has several added values, such as: debit card, eERC721 offer and relative marketplace, legal reliability in order to increase the clients' loyalty. But it rewards its users with an innovative method called AIRDROP RANKING SYSTEM, which periodically rewards its users

CEX TRANSACTION MODEL

```
graph TD; subgraph UI [USER INTERFACE]; U1[User Selects "Buy" or "Sell"]; U2[Send to Trading Engine - "Accepted"]; U3[User Selects "Modify" or "Cancel"]; U4[Refresh UI]; U5[User Enter Standing Order - "Active"]; end; subgraph TE [TRADING ENGINE]; A1(Automated Validation - "Validating"); A2(Pending Manual Validation); Q1((Are Sufficient Funds Available?)); Q2((Is Manual Confirmation Required?)); P1(Pending / Suspended - "Pending / Suspended"); F1(Failed Validation - "Cancelled"); ST[Scheduled Tasks]; R1(Re-validate suspending / pending order); R2(Standing Orders Take Profit / Stop Loss); E1(Execute Order - "Executing"); A1 -- YES --> PMV[A1]; A1 -- NO --> Q1; Q1 -- YES --> Q2; Q1 -- NO --> P1; Q2 -- YES --> PMV; Q2 -- NO --> SFE[Freeze Balance Needed for Transaction]; PMV --> SFE; SFE --> RVT[Re-validate transaction with latest prices]; RVT --> SC[Security / Sanity Check]; SC --> E1; E1 --> AC[Await Confirmation - "Conforming"]; AC --> UC[Update Customer Balances]; UC --> ST; ST --> R1; ST --> RS[Re-validate suspending / pending order]; RS --> R2; R2 --> ST; P1 --> F1; F1 --> E1; E1 --> C[Completed - "Completed"]; C --> H[Finished Delete from Queue, Move to historical store]; H --> RU[U4]; U1 --> A1; U2 --> A1; U3 --> A1; U3 --> E1; U5 --> RS; end; subgraph BA [BITCOIN API]; EB[Execute Buy / Sell Order]; CB[Check BTC Balance]; W((Wallet)); end; A1 --> EB; Q1 --> CB; Q2 --> CB; SC --> CB; E1 --> CB; AC --> CB; UC --> CB; R1 --> CB; R2 --> CB; W --> CB;
```

The diagram illustrates the CEX Transaction Model, organized into three main layers: USER INTERFACE, TRADING ENGINE, and BITCOIN API.

USER INTERFACE:

- User Selects "Buy" or "Sell"
- User Selects "Modify" or "Cancel"
- User Enter Standing Order ("Active")

TRADING ENGINE:

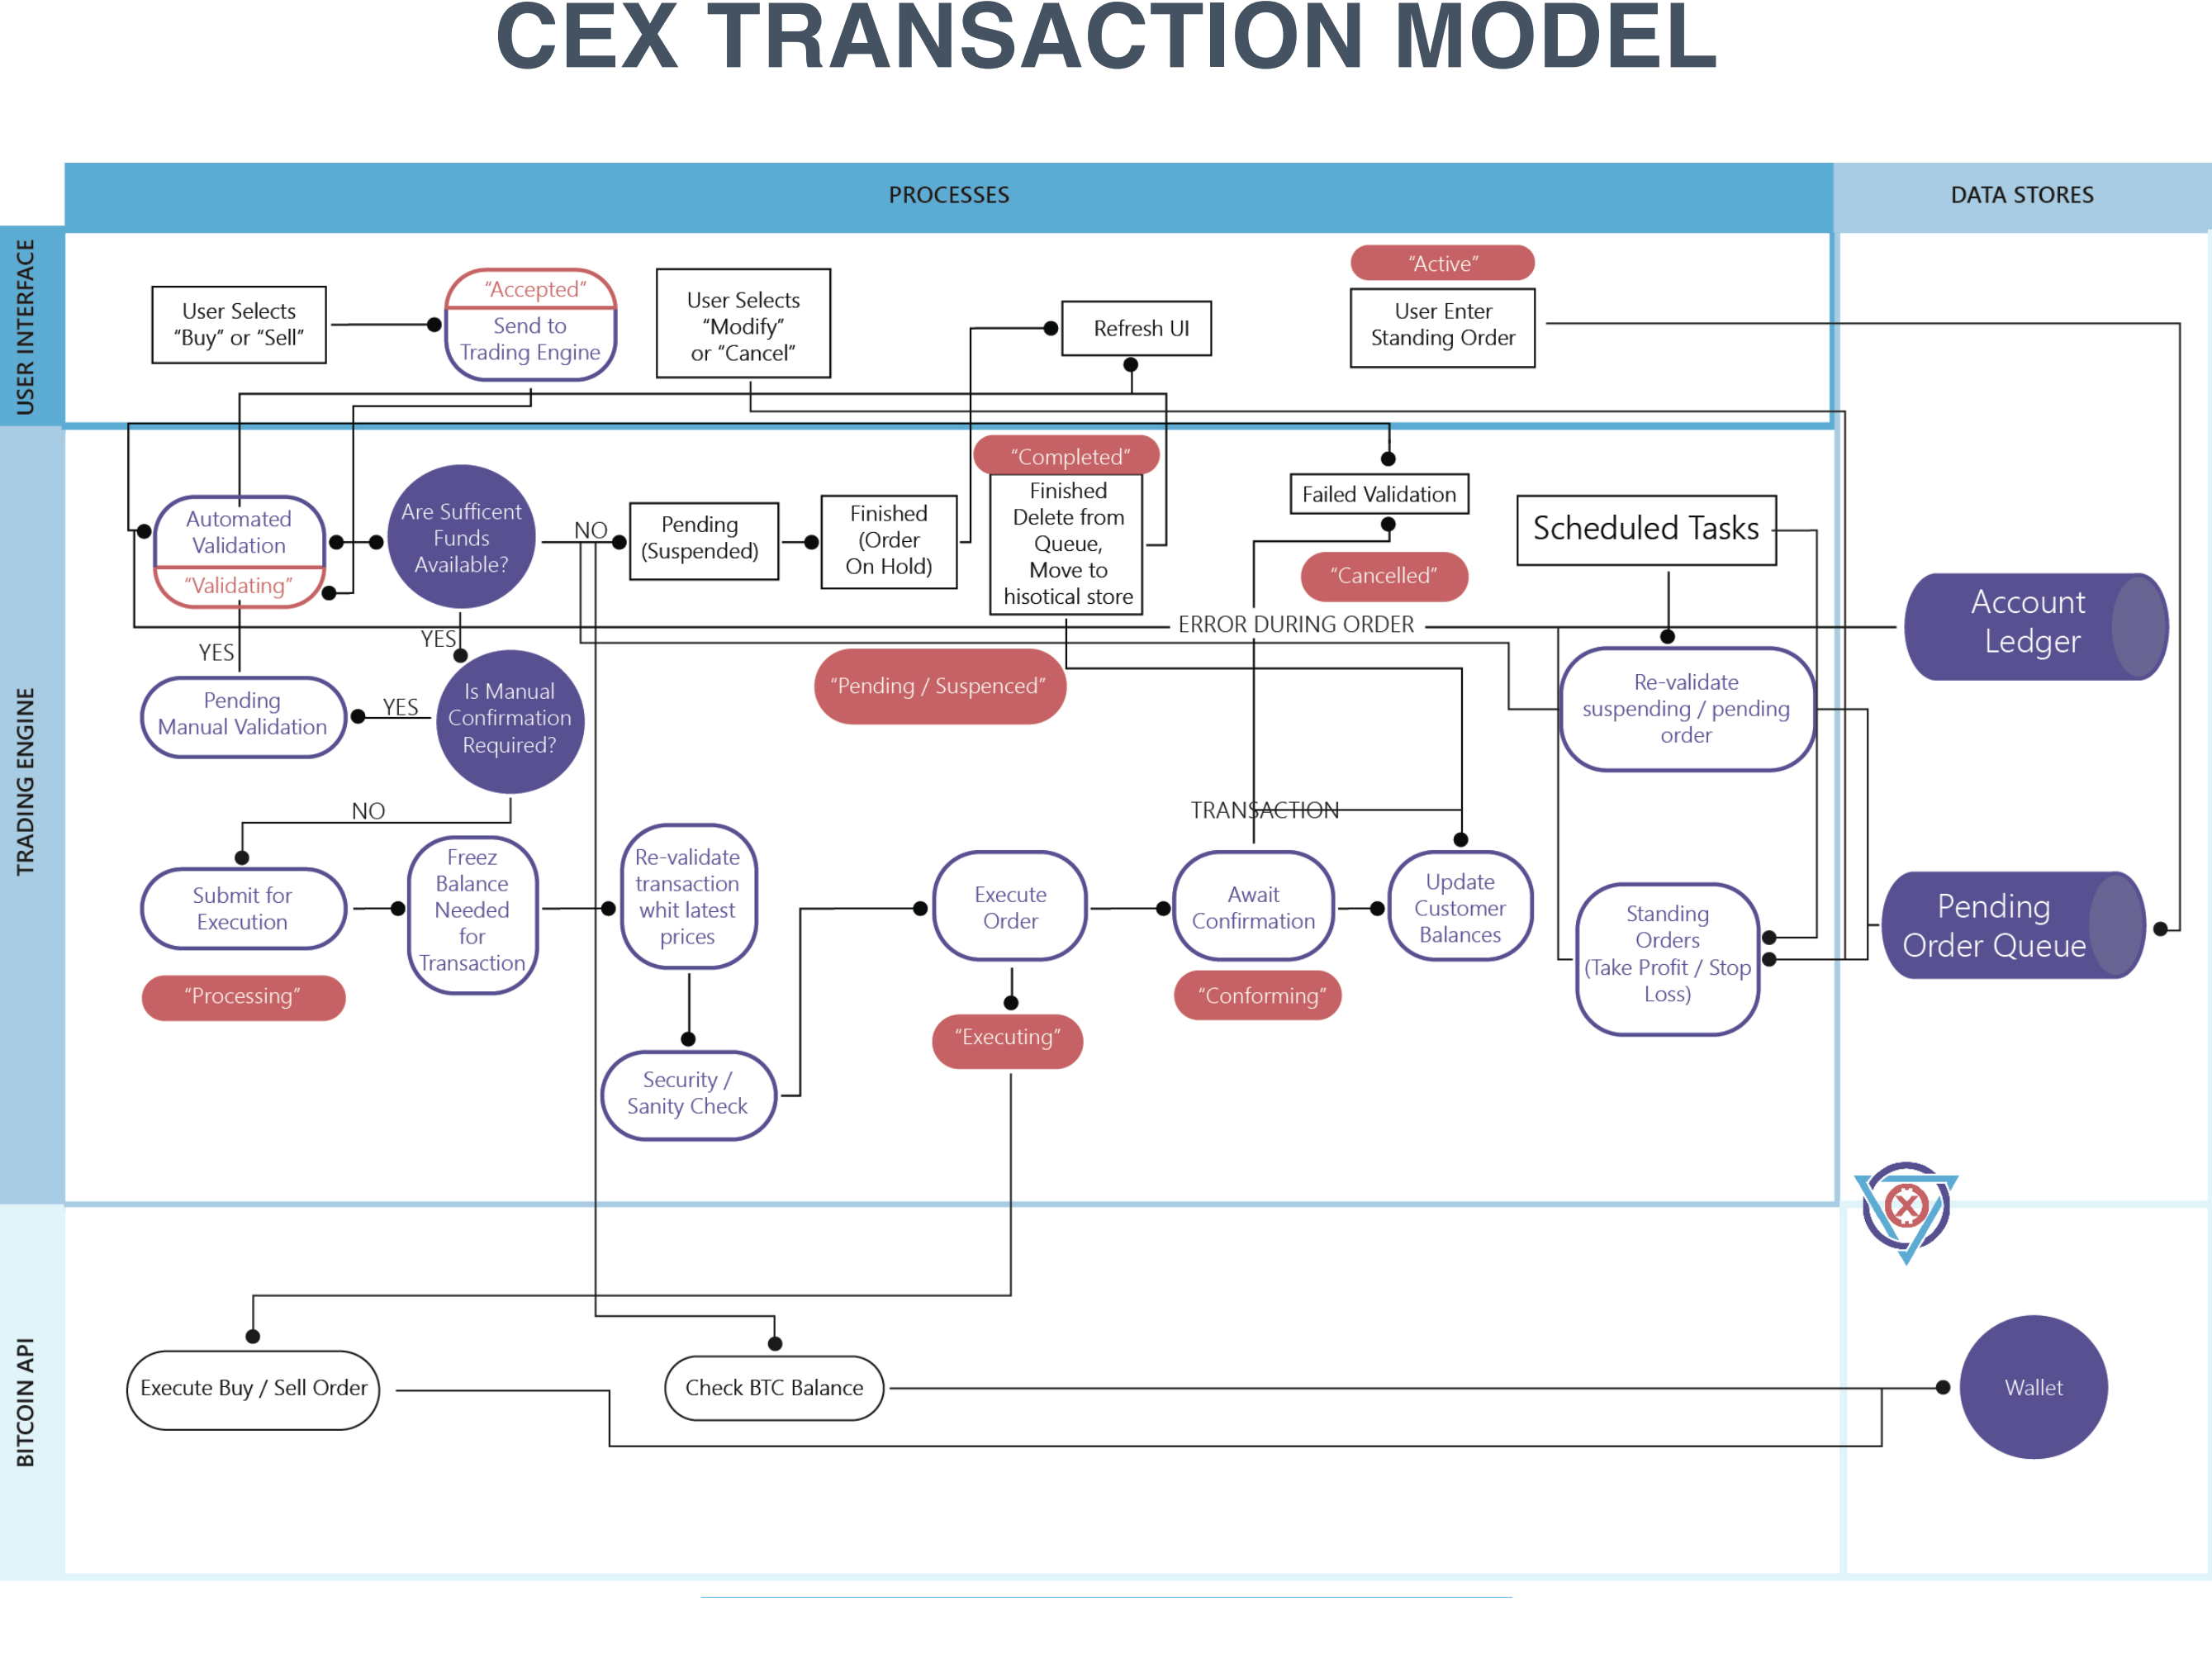

- Automated Validation ("Validating")**: Processes initial orders. If successful, it moves to Pending Manual Validation. If funds are insufficient, it moves to Pending (Suspended).
- Pending Manual Validation**: Requires manual confirmation. If confirmed, it proceeds to Submit for Execution. If not, it moves back to Automated Validation.
- Submit for Execution ("Processing")**: Moves to Freeze Balance Needed for Transaction.
- Freeze Balance Needed for Transaction**: Moves to Re-validate transaction with latest prices.
- Re-validate transaction with latest prices**: Moves to Security / Sanity Check.
- Security / Sanity Check**: Moves to Execute Order.
- Execute Order ("Executing")**: Moves to Await Confirmation.
- Await Confirmation ("Conforming")**: Moves to Update Customer Balances.
- Update Customer Balances**: Moves to Scheduled Tasks.
- Scheduled Tasks**: Includes Re-validate suspending / pending order and Standing Orders (Take Profit / Stop Loss). Both lead back to the main processing flow.
- Pending (Suspended) / Failed Validation ("Cancelled")**: Leads to Finished Delete from Queue, Move to historical store, which then triggers a Refresh UI.
- Completed ("Completed")**: Final state after successful execution.

DATA STORES:

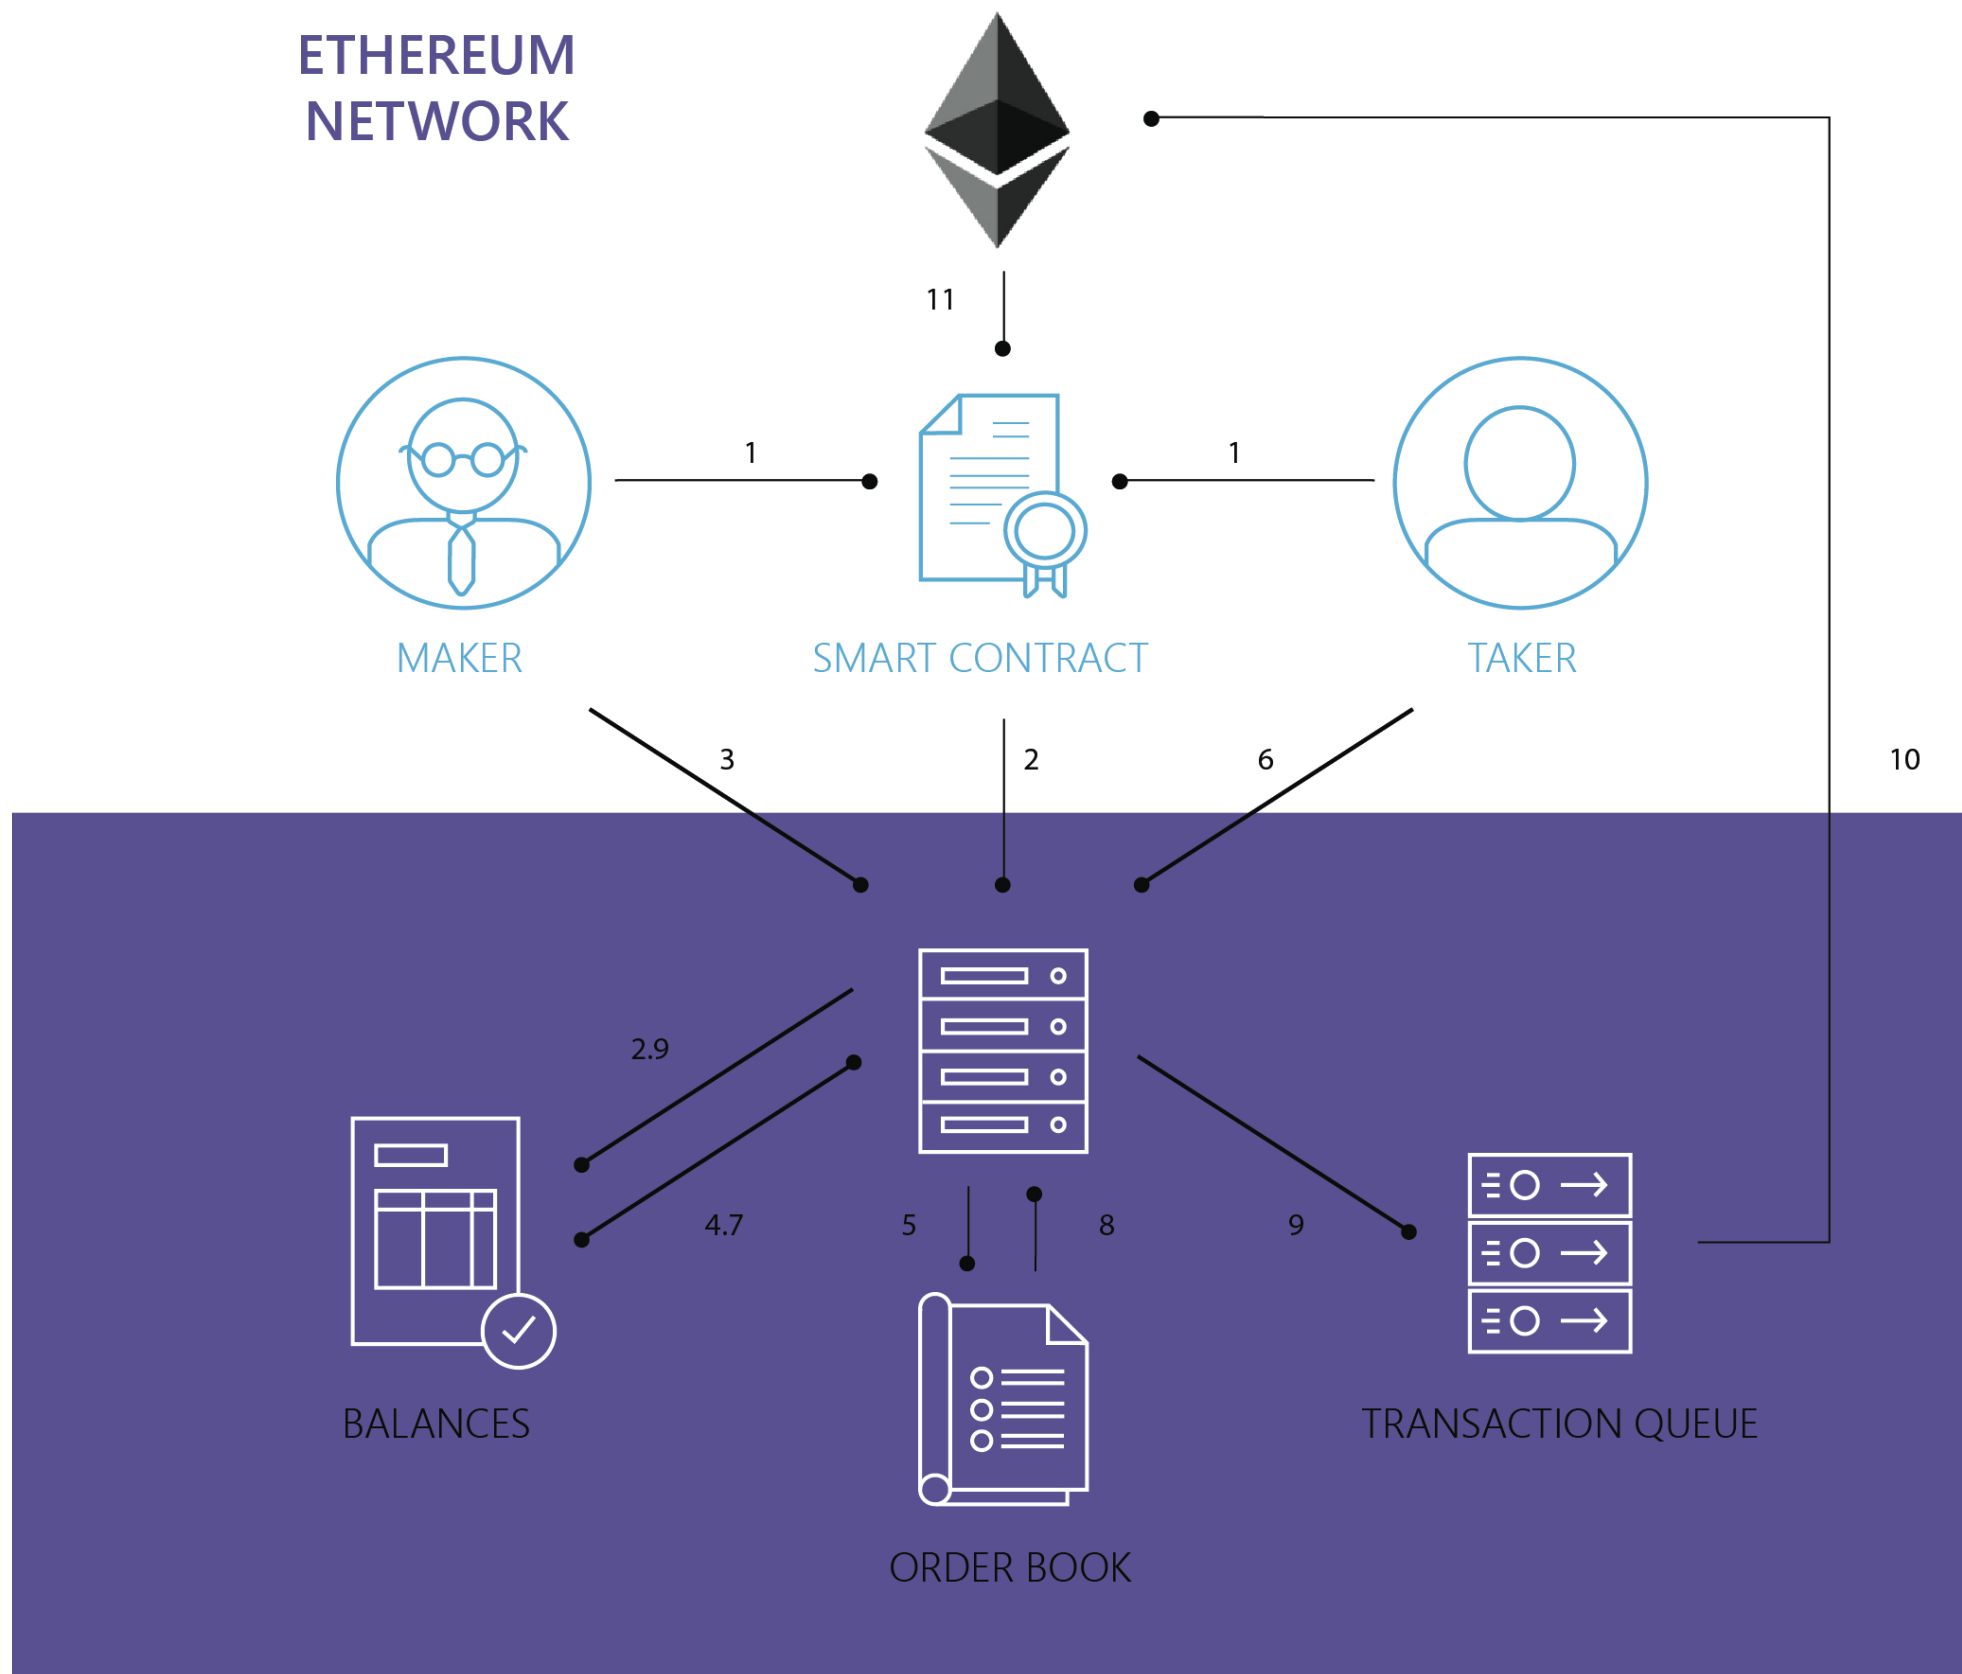

- Account Ledger
- Pending Order Queue

BITCOIN API:

- Execute Buy / Sell Order
- Check BTC Balance
- Wallet

ECOSYSTEM TRANSACTION MODEL

AIRDROP RANKING SYSTEM WORK-FLOW

With more and more competitors, constant improvements and technological changes, it is now very difficult to stand out. To do so, we must first focus on our strengths and build on the xCrypt ecosystem to take over new markets and reach a bigger target!

Today, we decided to play along and give you our greatest qualities, how we stand out from our competitors and why you should choose xCrypt.

We strive to offer an industry-leading trading experience, tutorials and platform that allow you to trade like a professional trader. Learn software, creative, and business skills to achieve your personal and professional goals and trade like a pro in a very secure environment.

All these different aspects of securing the business environment are connected to the current focus on trading facilitation, the implementation of zero fees transaction.

In order to achieve zero fee transactions, we want to implement a marketing strategy that will benefit both our investors and our traders, apart from profit opportunities for the trading our users will benefit from our affiliate reward system each user you refer to our platform can bring you a extra passive profit.

xCrypt is a trading platform designed to exchange and trade the coins in a peer-to-peer environment. The xCrypt token can also be bought and sold with both fiat currencies and alternative cryptocurrencies. As an addition to this, the price of the coin will be determined by the different market forces and cryptocurrency exchange systems.

The price of the coin does not have a maximum level, meaning that it can increase to remarkable values.

xCrypt token does have a finite number of tokens, limited to 200,000,000 tokens. xCrypt Exchange Platform will support all top 100 cryptocurrencies and many fiat currencies. The cryptocurrencies will be carefully selected based on currency liquidity and demand to ensure that all the cryptos on xCrypt. Finance are highly active and valuable to users of the wallet. In the future, based on market needs, we could expand the number of currencies the wallet supports.

xCrypt Exchange will redefine crypto trading. Might sound too ambitious but this is

the only reason we decided to introduce a new crypto exchange to a market which is flooded by malfunctioning exchange platforms that are lagging the evolution of crypto trading. Our exchange will provide a much better and user-friendly interface with advanced graphs .A much faster service which will never delay orders or withdrawals .A much stronger engine which can handle existing and future market demand without faltering.
